moral aspects of
caretaking. He also
writes about the
problems our society
faces as medical
technology advances
and the cost of health
care soars but caring for
patients no longer seems
important. Caregiving is
long, hard, unglamorous
work--at moments
joyous, more often
tedious, sometimes

agonizing, but it is
always rich in meaning.

For Cultivating
Death And
current political
indifference and the
challenge to the health
care system, he
emphasizes how we
must ask uncomfortable
questions of ourselves,
and of our doctors. To
give care, to be
"present" for someone
who needs us, and to

File Type PDF

Care Of The

feel and show kindness
are deep emotional and
moral experiences,
enactments of our core
values. The practice of
caregiving teaches us
what is most important
in life, and reveals the
very heart of what it is
to be human.

Few experiences stir the
emotions and throw a
person into crisis as

Page 37/57

illness does. It affects not only the body but also the spirit and soul. Illness is about life and death, fear and hope, love and conflict, spirit and body. And yet, the healthcare system is not structured around these considerations—our doctors and other medical professionals are not trained to deal with the whole person.

Medicine is Moore's

manifesto about the

future of healthcare. In

this new vision of care,

Moore speaks to the

importance of healing a

person rather than

simply treating a body.

He gives advice to both

healthcare providers and

patients for maintaining

dignity and humanity.

He provides spiritual

guidance for dealing
with feelings of
mortality and threat,
encouraging patients to
not only take an active
part in healing but also
to view illness as a
positive passage to new
awareness. While we
don't fully understand
the extent to which
healing depends on

shown that healing

needs to focus on more than the body. The future of medicine is not only in new technical developments and research discoveries; it is also in appreciating the state of soul and spirit in illness.
