convenient resource. The dissections are amazingly clear, almost 3-D in appearance, and color-coded artwork next to each photo makes anatomy easy to interpret and identify. Spanish version of 2nd edition also available, ISBN: 84-8086-118-5

A concise, colorful alternative to more detailed textbooks of medicine, this latest edition incorporates a large number of color photographs to show key presenting signs and symptoms as they are seen in practice. Offering a remarkable value, it features over 1,500 illustrations including clinical photographs, endoscopic images, ultrasound scans, ECG's, and summary tables. In addition to the illustrations, the book provides concise accompanying text, detailed legends, and Key Facts boxes to make exam revision easier. An unrivalled collection of clinical images depicts presenting signs and trains the reader to recognize the physical signs of underlying disorders. Focusing on only the essential concepts, it makes learning and retention much easier. A convenient and portable size makes the book more manageable and appealing. A more accessible writing style, with headings and bullet points, assists speed reading and review. Key Facts boxes increase retention. Color photos and imaging pictures (CTs/MRIs) have been improved.

Clinical Embryology: A Color Atlas and Text unravels and illuminates the complex process of both normal and abnormal prenatal human developments. Vivid color drawings and photographs, many in three dimensions, clarify difficult concepts and bring contemporary clinical examples to life. Each section of the atlas includes pertinent case reports, clinical photographs, radiologic studies, and examples from the pathology lab - emphasizing the

importance of embryology across the field of medicine.

Provides students with information on the structure and function of tissues and organs at the cellular level. Hystophysiologic and clinical information feature at the beginning of each chapter and thumbnail illustrations have been added to the legend.

Offering a unique format of high quality illustrations and clear, concise text, COLOR ATLAS AND TEXT OF NEUROLOGY is the perfect reference to improve the non-specialist's fundamental understanding of neurological disorders. It provides vital information on the key techniques of the neurological work-up: analysis of behavior, interview, examination, presenting physical signs, and analysis of investigation results. From cover to cover, it assists the reader in making an accurate diagnosis -- an often difficult task in this challenging area. Extremely well illustrated, with just the right amount of textual information to help the physician perform the neurological work-up and arrive at a correct diagnosis. Contains a high proportion of clinical examination information, symptom discussion, and corresponding artwork, assisting the reader in making informed decisions. Focuses on the most common diseases and disorders -- those that are typical of what the non-neurologist is likely to see in his or her practice. Includes information on clinical and pathological appearances of neurological disorders, with a brief description of each; also covers the course, clinical presentation, differential diagnosis, investigations, and principles of management for each disorder.

Covering the whole of clinical medicine, this work comprises illustrations highlighting the

clinical signs of all major medical disorders, accompanied by radiological, ultrasound, endoscopic and other images. Each chapter provides a guide to symptoms, investigations, common and rare disorders.

The neuroendocrine system is fascinating. It is an intriguing, complex system. For centuries, it has sustained the interest of scientists, who have provided the community with a wealth of information on neuroendocrine tumors types—history, genetics, clinical presentation, surgical pathology, differential diagnoses...on everything except cytopathology...until now. This one-of-a-kind color atlas fills a long-standing void in neuroendocrine resources. This atlas provides clear, descriptive information on the cytopathology of neuroendocrine tumor types and differential diagnoses in one cutting-edge, comprehensive resource. This unique atlas is dedicated exclusively to providing expert, illustrated coverage of the cytopathology of neuroendocrine tumors.
