This volume uses the study of firm dynamics to investigate the factors preventing faster productivity growth in Latin America and the Caribbean, pushing past the limits of traditional macroeconomic analyses. Each chapter is dedicated to an examination of a different factor affecting firm productivity - innovation, ICT usage, on-the-job-training, firm age, access to credit, and international linkages - highlighting the differences in firm characteristics, behaviors, and strategies. By showcasing this remarkable heterogeneity, this collection challenges regional policymakers to look beyond one-size-fits-all solutions and create balanced policy mixes tailored to distinct firm needs. This book is open access under a CC BY-NC-ND 3.0 IGO license.

Women make up a little over half of the world's population, but their contribution to measured economic activity and growth is far below its potential. Despite significant progress in recent decades, labor markets across the world remain divided along gender lines, and progress toward gender equality seems to have stalled. The challenges of growth, job creation, and inclusion are closely intertwined. This volume brings together key research by IMF economists on issues related to gender and macroeconomics. In addition to providing policy prescriptions and case studies from IMF member countries, the chapters also look at the gender gap from an economic point of view.

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements, summarises the relevant unit content and includes a series of specimen questions and answers. There are three sections to each guide: Introduction - includes advice on how to use the guide, an explanation of the skills being tested by the assessment objectives, an outline of the unit or module and, depending on the unit, suggestions for how to revise effectively and prepare for the examination questions. Content Guidance - provides an examiner's overview of the module's key terms and concepts and identifies opportunities to exhibit the skills required by the unit. It is designed to help students to structure their revision and make them aware of the concepts they need to understand the exam and how they might analyse and evaluate topics. Question and Answers - sample questions and with graded answers which have been carefully written to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

Political Crises, Social Conflict and Economic Development is a rare attempt to undertake comparative political economy analysis of the Andean region and thus represents a welcome contribution. . . It is clearly written and will engage scholars interested in Latin America from a wide range of disciplines. Jonathan di John, Journal of Agrarian Change This collection of essays on the political economy of the Andean region goes to the heart of the struggle these smaller economies face in completing crucial reforms and achieving higher growth. Andrés Solimano has brought together the best and the brightest talent from each country, the result being the most compelling analysis ever of how enclave development and a historical dependence on

primary exports renders these countries distinctly Andean. As the essays argue, the political solutions and economic remedies must address this phenomenon, rather than mimicking those strategies of the larger emerging market countries in the region. Carol Wise, University of Southern California, US The contributors to this authoritative volume analyze the impact of political crises and social conflict on economic performance in the Andean region of Latin America. The blend of theory and case studies is also relevant for understanding other complex societies in the developing world and transition economies. The book provides illuminating insights on how to understand, and survive, the complicated interactions between volatile politics, unstable democracies, violence, social inequality and uneven economic performance. Recent political economy theories are combined with valuable quantitative and qualitative information on presidential crises, breakdowns of democracy, constitutional reforms, quality of institutions, and social inequality and exclusion to understand actual country realities. Part I provides the conceptual framework and a regional perspective of the book. Part II contains five political economy country studies Bolivia, Colombia, Ecuador, Peru and Venezuela written by leading scholars in the field and former senior policymakers, including a former President. Together, the chapters highlight the detrimental effects of political instability and social conflict on economic growth and stability, as well as the feedback effects from poor economic performance on political instability and institutional fragility. The country studies warn that narrow economic reforms that do not pay adequate attention to politics, institutions and social structures are bound to fail in bringing lasting prosperity and stability to complex societies. Examining new and rich information on episodes of political turmoil, military interventions, forced presidential resignations, constitutional reforms and social uprisings, this book will be required reading for all those interested in the interface of politics and economic development.

Chemistry for the IB Diploma, Second edition, covers in full the requirements of the IB syllabus for Chemistry for first examination in 2016. This digital version of Chemistry for the IB Diploma Coursebook, Second edition, comprehensively covers all the knowledge and skills students need during the Chemistry IB Diploma course, for first examination in 2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.

"The education to work transition of young people is key to a successful work-life and to fight youth unemployment. The book provides an impressive outline of the facts and convincing insights of the potential causes. This offers a large and broader audience help to adjust properly to achieve a better life." Klaus F. Zimmermann, IZA, Bonn, Germany This work points to the youth experience gap as a key concept to explain the meager employment opportunities and earnings many young people face. The transition from education to work remains a long dark tunnel around the world. However, this book shows that there are striking differences between countries: in Germany, the young people of today are no worse off than their adult counterparts, while in Southern European and Eastern European countries they fare 3 through 4 times worse. The current economic and financial crisis has further exacerbated the situation for young people in many advanced economies. Observers are divided as to the optimal design of youth employment policy. Liberalists believe that the market itself should address youth disadvantages. More flexible labor markets should also guarantee greater labor turnover, including temporary work, so as to allow young people to move from one job to the next until they accumulate the work experience they need to become more employable and find the right career. In contrast, other economists oppose approaches focusing on entry flexibility and temporary work, claiming that the former type helps only the most skilled and motivated target groups, while the latter only allows young people to gather generic, not job-specific work experience.

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Why are citizens in some countries more willing to pay taxes than in other countries? This book examines the history of the relationship between citizens and their states in five countries, (Sweden, Britain, Italy, Romania, and the United States), and demonstrates how and why people in in some countries have come to trust the government with their money while in other countries they do not. The book explores the evolution of this relationship in detail, in each case showing how some governments developed the fiscal and technical capacity to tax their citizens fairly and deliver public services efficiently. In short, how and why some countries became more trustworthy than others. The volume concludes by examining the implications of these five cases for developing countries today and the lessons that can be learned.

Analytical work on Indonesian macroeconomic and financial issues, with an overarching theme on building institutions and policies for prosperity and inclusive growth. The book begins with a 20-year economic overview by former Finance Minister Chatib Basri, with subsequent chapters covering diverse sectors of the economy as well as Indonesia's place in the global economy.
