Fallen Angels was published in 1988, twenty years after Sonny had died, but Walter wrote it for, and because of, his brother. Not everyone has loved Myers' gritty, non-heroic depiction of Vietnam. The book is in the top 20 of the American Library Association's 100 Most Frequently Challenged Books of 1999-2000, mostly for the profanity.

As the Civil War rages, another battle breaks out behind the lines. During a long hot July in 1863, the worst race riots the United States has ever seen erupt in New York City. Earlier that year, desperate for more Union soldiers, President Abraham Lincoln instituted a draft—a draft that would allow the wealthy to escape serving in the army by paying a \$300 waiver, more than a year's income for the recent immigrant Irish. And on July 11, as the first drawing takes place in Lower Manhattan, the city of New York explodes in rage and fire. Stores are looted; buildings, including the Colored Foundling Home, are burned down; and black Americans are attacked, beaten, and murdered. The police cannot hold out against the rioters, and finally, battle-hardened soldiers are ordered back from the fields of

Gettysburg to put down the insurrection, which they do—brutally. Fifteen-year-old Claire, the beloved daughter of a black father and Irish mother, finds herself torn between the two warring sides. Faced with the breakdown of the city—the home—she has loved, Claire must discover the strength and resilience to address the new world in which she finds herself, and to begin the hard journey of remaking herself and her identity. Addressing such issues as race, bigotry, and class head-on, Walter Dean Myers has written another stirring and exciting novel that will shake up assumptions, and lift the spirit. From the Hardcover edition.

Frankenstein; or, The Modern Prometheus is a novel written by the British author Mary Shelley. The first

edition was published anonymously in London in 1818, and Shelley's name appeared on the revised third edition, published in 1831. The title of the novel refers to the scientist, Victor Frankenstein, who learns how to create life and creates a being in the likeness of man, but larger than average and more powerful. In modern popular culture, people have tended to refer to the Creature as "Frankenstein" (especially in films since 1931), despite this being the name of the scientist, and the creature being unnamed in the book itself.

Frankenstein is a novel infused with elements of the Gothic novel and the Romantic movement. It was also a warning against the "over-reaching" of modern man and the Industrial Revolution, alluded to in the novel's subtitle, *The Modern Prometheus*. The

story has had an influence across literature and popular culture and spawned a complete genre of horror stories and films. It is arguably considered the first fully-realised science fiction novel and raises many issues still relevant to today's society.

Educational leaders are seeing with increasing clearness the necessity of teaching students not only the subject-matter of study but also methods of study. Teachers are beginning to see that students waste a vast amount of time and form many harmful habits because they do not know how to use their minds. The recognition of this condition is taking the form of the movement toward "supervised study," which attempts to acquaint the student with principles of economy and directness in using his mind. It is generally agreed that there are certain "tricks" which make for mental efficiency, consisting of methods of apperceiving facts, methods of review, devices for arranging work. Some are the fruits of psychological experimentation; others are derived from experience. Many of them can be

imparted by instruction, and it is for the purpose of systematizing these and making them available for students that this book is prepared. The evils of unintelligent and unsupervised study are evident to all who have any connection with modern education. They pervade the entire educational structure from kindergarten through college. In college they are especially apparent in the case of freshmen, who, in addition to the numerous difficulties incident to entrance into the college world, suffer peculiarly because they do not know how to attack the difficult subjects of the curriculum. In recognition of these conditions, special attention is given at The University of Chicago toward supervision of study. All freshmen in the School of Commerce and Administration of the University are

given a course in Methods of Study, in which practical discussions and demonstrations are given regarding the ways of studying the freshman subjects. In addition to the group-work, cases presenting special features are given individual attention, for it must be admitted that while certain difficulties are common to all students, there are individual cases that present peculiar phases and these can be served only by personal consultations. These personal consultations are expensive both in time and patience, for it frequently happens that the mental habits of a student must be thoroughly reconstructed, and this requires much time and attention, but the results well repay the effort. A valuable accessory to such individual supervision over students has been found in the use of psychological tests
