with overall knowledge of engineering materials, tools and equipment commonly used in the engineering field. The book describes the general principles of different workshop processes such as primary and secondary shaping processes, metal joining methods, surface finishing and heat treatment. The workshop processes covered also include the hand-working processes such as benchwork, fitting, arc welding, sheet metal work, carpentry, blacksmithy and foundry. It also explains the importance of safety measures to be followed in workshop processes and details the procedure of writing the records of the

practices. The tools and equipment used in each hand-working process are enumerated before elaborating the process. Finally, the book discusses the machining processes such as turning operations, the cutting tools and the tools used for measuring and marking, and explains the working principle of Engine Lathe. An appendix for advanced level practice and assessment of work has also been included. and the latter will be found Of but an elementary character, involving only simple equations, fractions, and the use Of tables Of sines and logarithms. The substitution Of graphic treatment for the higher mathematics in many cases will, I think, be appreciated by most students. As regards the order Of Part II., the Strength Of Materials without doubt comes first, to be followed by Energy and Kinematics; these all assist in the treatment Of Prime Movers worked by gases or liquids. With the knowledge acquired from Part I. And his own experience in the workshop, supplemented by the theory Of Part

The book is meant for first year BE/B.Tech. students and addresses the course curriculum in Mechanical Experiments and Workshop Practice. The book explains theory and methodology of performing experiments about:

- " Mechanics "
- Strength of Materials "
- Materials Science

The book also includes:

- " IC Engines "
- Steam Engines "
- Boilers "
- Steam Turbines "
- Water Turbines and Pumps

Manufacturing processes and workshop experiments are included in workshop practice which cover:

- " Machining "
- Welding "
- Metal forming "
- Casting "
- Carpentry and Plumbing

Key Features: " It provides a large number of

First published in 1972. Routledge is an imprint of Taylor & Francis, an informa company. Dr Chapman's books on workshop technology and calculations have long had an international reputation in workshops and colleges. In their latest editions they now all use SI units throughout. Changes have been made where necessary to take account of developments in practice and equipment, but on the whole the original character and style of the books have been retained. It is the method of instruction which Dr Chapman has
