With the critically acclaimed novels *The Gate To Women's Country*, *Raising The Stones*, and the Hugo-nominated *Grass*, Sheri Tepper has established herself as one of the major science fiction writers of our time. In *Beauty*, she broadens her territory even further, with a novel that evokes all the richness of fairy tale and fable. Drawing on the wellspring of tales such as "Sleeping Beauty," *Beauty* is a moving novel of love and loss, hope and despair, magic and nature. Set against a backdrop both enchanted and frightening, the story begins with a wicked aunt's curse that will afflict a young woman named Beauty on her sixteenth birthday. Though Beauty is able to sidestep tragedy, she soon finds herself embarked on an adventure of vast consequences. For it becomes clear that the enchanted places of this fantastic world--a place not unlike our own--are in danger and must be saved before it is too late.

"Lively, thought-provoking . . . the plot is ingenious, packing a wallop of a surprise . . . Tepper knows how to write a well-made, on-moving story with strong characters. . . . She takes the mental risks that are the lifeblood of science fiction and all imaginative narrative."—Ursula K. LeGuin, *Los Angeles Times* Since the flames died three hundred years ago, human civilization has evolved into a dual society: Women's Country, where walled towns enclose what's left of past civilization, nurtured by women and a few nonviolent men; and the adjacent garrisons where warrior men live—the lost brothers, sons, and lovers of those in Women's Country. Two societies. Two competing dreams. Two ways of life, kept apart by walls stronger than stone. And yet there is a gate between them. . . . "Tepper not only keeps us reading . . . she provokes a new look at the old issues."—*The Washington Post* "Tepper's cast of both ordinary and extraordinary people play out a powerful drama whose significance goes beyond sex to deal with the toughest problem of all, the challenge of surmounting humanity's most dangerous flaws so we can survive—despite ourselves."—*Locus*

"One of the most satisfying science fiction novels I have read in years."—*The New York Times Book Review* Here is a novel as original as the breathtaking, unspoiled world for which it is named, a place where all appears to be in idyllic balance. Generations ago, humans fled to the cosmic anomaly known as *Grass*. Over time, they evolved a new and intricate society. But before humanity arrived, another species had already claimed *Grass* for its own. It, too, had developed a culture. . . . Now, a deadly plague is spreading across the stars. No world save *Grass* has been left untouched. Marjorie Westriding Yrarier has been sent from Earth to discover the secret of the planet's immunity. Amid the alien social structure and strange life-forms of *Grass*, Lady Westriding unravels the planet's mysteries to find a truth so shattering it could mean the end of life itself.

Originally published in hardcover in 1992.

"Thursday morning. One hundred pounds overweight, no man in sight, and rounding the bend to 57 years old—a full-blown catastrophe." What happens when you realize you've had the career of your dreams, but you don't have the life of your dreams? This was the stark reality facing Sheri Salata when she left her twenty-year stint at *The Oprah Winfrey Show*, Harpo Studios and the OWN network. She had dedicated decades to her dream job, and loved (almost) every minute of it, but had left the rest of her life gathering dust on the shelf. After years of telling other people's makeover stories, Sheri decided to "produce" her own life transformation. And this meant revisiting her past, excavating its lessons, and boldly reimagining her future. In these pages, she invites readers along for the ride—detoxing in the desert, braving humiliation at Hollywood's favorite fitness studio, grappling with losses, reinventing friendships, baring her soul in sex therapy, and more. Part cautionary tale, part middle-of-life rallying cry, Sheri's stories offer profound inspiration for personal renewal.

"Tepper takes the traditional icons of fantasy, restores their resonance, and makes them her own."—*Minneapolis Star Tribune* A century ago, a mysterious force wiped out human life on all surrounding worlds, leaving the planet Dinadh untouched. Now the unknown force is back—and this time humanity's only hope lies with a woman who'd give anything not to get involved. Lutha Tallstaff's mission is to locate the famed adventurer Leelson Famber, who has disappeared, taking with him what may be the only clue to the nature of the deadly threat. But Lutha cannot know that finding Famber will be the easy part of her journey. Through terrain alive with savage winged wraiths and fountains of fire, she will fight her way to the holiest place on the planet. And only then will she discover the shocking truth about the coldly inhuman force that threatens the future of mankind.

Atop a twisting, canyon-climbing road, a witch lurks in a fortress built strong to keep out dragons and ogres. In another part of the countryside, a young orphan is maturing into a beautiful woman in the enchanted village that is her home. Somewhere nearby, a young man is seeking adventure after running away from his family's small farm. Suddenly a strange and terrible prophecy sets off a chain of events that will bring these three together in the heroic, romantic, and thrilling tale of an age-old battle.

I am called Jinian Footseer by some. By some, Jinian Star-Eye. And by some, the Wizard Jinian. One or two call me Dervish Daughter. On thinking it over, I decided I had been right all along. Everything I had told Peter was true. All the evidence pointed in one way and one way only. I felt as I had felt so long

ago, travelling toward Bleer with Peter, when he put the clues to a mystery in my hands and asked me to make sense of it. Now, as then, all the pieces were in my hands, or my head. The great flichhawk who had granted me a boon in Chimmerdong, and the d'bor wife, and the gobblemole. The story of Lite Star and the Daylight Bell. The Oracle. The Eesties. Yellow crystals and blue, separated by a thousand years of time. My illness in Chimmerdong, the diagnoses of Bartelmy of the Ban, the Dervish, my mother. All these. No matter how I turned them, there was no other explanation. Could anything be done?

The Presences mean something different to each of Jubal's colonists. In some, these towering crystals inspire awe, in others fear. A small band must break through the long silence between humanity and the Presences to strike a new alliance-and bring about the end of a tyrannical dynasty.

In her 35th novel, science fiction master Sheri S. Tepper boldly weaves together the storylines of eleven of her previous works—from King's Blood Four (1983) to The Waters Rising (2010). In Fish Tails, two of Sheri S. Tepper's beloved characters—Abasio and Xulai (A Plague of Angels and The Waters Rising)—and their children travel from village to village scattered across the sparsely populated land of Tingawa. They are searching for others who might be interested in adopting their sea-dwelling lifestyle. Along their journey they encounter strange visitors from the far-off world of Lom, characters from Tepper's nine-book True Game series of novels—Mavin Manyshaped, Jinian Star-eye, and Silkhands the Healer—all of whom have been gathered up by an interfering, time-traveling, rule-breaking do-gooder to do one last good deed on earth before its metamorphosis is complete. For the waters are rising and will soon engulf the entire planet, transforming it utterly and irrevocably.
