Other tutors and authors, while very intelligent, often make a mistake by teaching every student how to solve problems in the same way. They do not understand the philosophy of the test and do not always know how to translate their own genius into points which would fit a specific student's needs depending on his/her math level. "The 32 Most Effective SAT Math Strategies" is perfect for your SAT math prep for 5 reasons: 1. Dr. Warner realizes that every student learns differently and this is one of the reasons that many problems are solved in several different ways using different strategies. There are 115 SAT math problems to practice with split into 5 levels and distributed among the 4 general topic areas covered on the test. Explanations of the solutions are so thorough and comprehensible that even second language speakers can easily follow them. 3. The book is designed to generate huge SAT score increases with only 20 minutes of math preparation each day. By arranging the problems by strategy, you can easily find the techniques that you need the most practice with. The level and topic of each question is clearly indicated so you can pick out the problems

The information in the introduction alone is enough to raise your SAT math score up to 50 points before you even attempt one math problem. 5. Dr. Warner has had to teach SAT prep for 14 years to accumulate the powerful combination of insights and strategies found in this book. Years of experience, a Ph.D. in math, and a unique approach have led to the ultimate product that outdoes any other SAT prep book.
